

ADITYA SHARAN

Product Manager — Applied AI & Digital Products

20adityasharan@gmail.com | +91 9004349389 | India | [LinkedIn](#) | [ArtStation](#)

PROFESSIONAL SUMMARY

Product Manager in training — Product Management with Applied AI Program, IIT Roorkee — with 4+ years of design and creative production experience in gaming. Brings a strong creative and UX foundation together with requirements translation, cross-functional leadership, and systems thinking to build user-centered digital products.

PRODUCT & AI SKILLS

Product: Product Discovery, Problem Definition, Requirements Analysis, Product Strategy, Prioritization, Roadmapping, MVP Thinking, Product Lifecycle Management, Stakeholder Management

AI & Technology: Applied AI, Generative AI, AI Product Development, AI Use-Case Identification, AI Product Strategy, Human-AI Interaction, Technical Feasibility Assessment

Analytics & Experimentation: Product Metrics, KPI Definition, Data-Driven Decision Making, Funnel Analysis, A/B Testing

Execution: Cross-Functional Collaboration, Design-Engineering Collaboration, Agile Development, Workflow & Systems Optimization, Production Planning

Tools: Claude & ChatGPT (AI-assisted PRDs & specs), Notion, Figma, Jira, Confluence, Miro

PROFESSIONAL EXPERIENCE

Lead 3D Character Artist / Look Development — Battlebucks Nov 2025 – Present

- Own the requirements-to-delivery pipeline for character content end-to-end.
- Set production standards, balancing user experience, feasibility, and timelines.
- Drive workflow improvements to scale team output and consistency.

Senior 3D Character Artist / Look Development — Hitwicket Apr 2024 – Nov 2025

- Directed requirements, quality standards, and delivery for a 60+ character initiative.
- Partnered with Art, Design, Engineering, and Animation to ship player-facing features.
- Optimized pipeline performance; prioritized fidelity, cost, and timeline trade-offs.

3D Character Artist / Designer / Concept Artist — AltWorld Aug 2022 – Apr 2024

- Built a modular character customization system (shared meshes, reusable textures, blendshapes).
- Partnered with design and engineering to scale customization into reusable systems.
- Shifted workflow from one-off assets to systemized, reusable components.

3D Character Artist / Designer / Concept Artist — Warlands NFT Game Dec 2021 – Feb 2022

- Delivered digital characters from concept through production under tight constraints.
- Converted creative requirements into production-ready assets cross-functionally.

Character Animator / Video Editor Intern — Kotak Mahindra Foundation (Umang) Jun 2021 – Jul 2021

- Produced character animation and motion graphics for a digital learning product.

SELECTED PRODUCT INITIATIVES

Scalable Character Customization System — AltWorld

Reusable customization platform balancing user choice, feasibility, and performance.

Mobile Character Revamp — 60+ Characters — Hitwicket

Led delivery of a large-scale content initiative, improving mobile performance at scale.

EDUCATION

Product Management with Applied AI Program — iHUB Divyasampark, IIT Roorkee (Expected 2027)

Focus: Product Strategy · Product Discovery · Product Analytics · AI Product Development · Experimentation

B.Sc., Animation & Visual Graphics — Amity University Mumbai (2022)

TECHNICAL TOOLKIT

Systems: Unity, System Design, Real-Time Systems, Workflow Optimization

Creative Technology: ZBrush, Substance Painter, Adobe Photoshop
